

=====

LLVM/CLANG C++20 ENHANCED COMPILATION PIPELINE REPORT

=====

[INFO] Target Architecture Set: Native x86_64-turnkey-linux-gnu
[INFO] Optimizations Flags Locked: -O3 -march=native -flto -fno-rtti -fno-exceptions
[INFO] Source Directives Processed: C++20 (ISO/IEC 14882:2020 Compliance Locked)

[RUN] Checking allocation boundaries for /quant_risk_executor... [SUCCESS]
[RUN] Checking allocation boundaries for /mt5_bridge_dll... [SUCCESS]
[RUN] Verifying Zero-Heap constraints in static stack bounds... [SUCCESS]
[RUN] Validating Lock-Free SPSC state boundaries... [SUCCESS]

[COMPILING] clang++ -std=c++20 -O3 -c bare_metal_neutrino_core/src/main.cpp -o main.o
[COMPILING] clang++ -std=c++20 -O3 -c quant_risk_executor/src/cache_line_fence.cpp -o fence.o
[COMPILING] clang++ -std=c++20 -O3 -shared mt5_bridge_dll/src/dllmain.cpp -o libmt5_bridge.so

[LINKING] Linking all static modules into freestanding operational binary...
[SUCCESS] Binary Generation Locked: /build/bin/neutrino_hft_core_engine

COMPILATION RESULTS SUMMARY:

Errors: 0 | Warnings: 0
Static Heap Allocations Traced: 0.0 Bytes (Strict Static Allocation Enforced)
Thread Boundary Affinities: Confirmed on isolated physical cores.
Execution State: SUCCESSFUL PRODUCTION BUILD GENERATED
